

The QualiType font collection

Daniel Benjamin Miller

December 26, 2019

1 Description

These 45 fonts were created by QualiType. With the kind permission of John Colletti, these fonts have been released as free and open-source. The fonts are usable under the SIL OFL 1.1 or the GNU GPL 2.0 (or later, at your option) with a font exception. See `COPYING` for more details. The fonts do not include small capitals, old-style figures or any other OpenType goodies. They are released in part with future extension in mind. The `qualitytype` package will only carry the OpenType versions of the original 1992 fonts; improvements should be given a new name and a corresponding separate package.

2 Fonts Included

- QTAbbie
- QTAgateType-Bold
- QTAgateType-Italic
- QTAgateType
- QTAncientOlive-Bold
- QTAncientOlive
- QTAntiquePost

- QTArabic
